

## CONTENTS

Foreword by the Series Editor

Preface

### 1. WHAT IS USABILITY AND WHAT IS USABILITY TESTING?

The Times Have Changed

What Is Usability?

What Is User-Centered Design?

What Is Usability Testing?

Traditional Approach to Usability Testing

Discount Usability Testing

Testing Models

Testing with a Lab

Testing without a Lab

Field Testing

Cost-Justifying Usability

Costs of Testing

Costs of Not Testing

Benefits of Testing

Summary

Coming Up

Questions/Topics for Discussion

Exercises

References

### 2. OTHER METHODS FOR GETTING FEEDBACK ABOUT USABILITY

Feedback from Experts

Heuristic Evaluation

Cognitive Walkthroughs

Comparison of Methods

Feedback from Users

Focus Groups

Surveys and Interviews

Internal Sources of Customer Feedback

Summary

Coming Up

Questions/Topics for Discussion

Exercises

For Your Project

References

Appendix 2.1 Three-Fold Brochure

Appendix 2.2 Xerox Heuristic Evaluation Checklist

Appendix 2.3 Usability Inspection of *Technical Communication*

### 3. USER AND TASK ANALYSIS

Conceptual Design

Problems with Conceptual Models

User and Task Analysis

What You Can Learn from Users

What You Can Learn about Users' Tasks and Goals

Planning a Site Visit

Asking Questions

Illustrations from Site Visits

Constraints on Doing Site Visits

What Happens After a Site Visit

How Users Learn

Short-term and Long-term Memory

Learning Styles

Adult Learners

Understanding Web Users

Web Sites and Older Users

Summary

Coming Up

Questions/Topics for Discussion

Exercises

For Your Project

References

#### 4. ITERATIVE TESTING FOR USER-CENTERED DESIGN

Summative Evaluation vs. Formative Evaluation

Paper Prototyping

Creating and Testing Paper Prototypes

What Teams Can Learn from Paper Prototyping

Advantages and Disadvantages of Paper Prototyping

Medium- and High-Fidelity Prototyping

Summary

Coming Up

Questions/Topics for Discussion

Exercises

For Your Project

References

#### 5. PLANNING FOR USABILITY TESTING

Establishing the Team

Team Structure and Size

Defining the Issues and Audience

How Much Time Do You Have for the Test?

How Much Money Do You Have for the Test?

Where Will Testing Be Done and Under What Conditions?

Who Wants to Know the Results?

What Is Best Learned from Usability Testing vs. Other  
Methods?

Putting Planning into Practice: Hotmail Example

Case Problem: Usability Test of Hotmail

SPSU Team Analysis

Setting Goals and Measurements

Goals vs. Concerns

Establishing the User Profile

Defining the Characteristics of a Sub-group

Selecting the Tasks to Test

Organizing Tasks

Determining How to Categorize the Results

Top-down Approach

Bottom-up Approach

Writing the Test Plan

How to Format the Test Plan

Summary

Coming Up

Questions/Topics for Discussion

Exercises

For Your Project

- References
- Appendix 5.1 Test Plan
- 6. PREPARING FOR USABILITY TESTING
  - Creating the Screening Questionnaire
  - Recruiting Participants
    - Recruiting Directly
    - Recruiting Indirectly through Agencies
    - Scheduling Participants
    - Further Screening on Arrival
  - Creating Scenarios
  - Creating Post-Task and Post-Test Questionnaires
  - Defining Team Members' Roles
    - Facilitator/Briefer
  - Conducting the Walkthrough and the Pilot
    - Conducting the Walkthrough
    - Conducting the Pilot
  - Summary
    - Coming Up
  - Questions/Topics for Discussion
  - Exercises
    - For Your Project
  - References
  - Appendix 6.1 Hotmail Evaluation Team Checklists
- 7. CONDUCTING THE USABILITY TEST
  - A Typical Test Day
  - Greeting the Participant
  - Briefing the Participant

Pre-test Briefing

"Thinking-Out-Loud" Procedure

Being an Unbiased Briefer/Debriefer

How (and When) to Intervene

Handling Help Calls

Handling Visitors

The Good, the Bad, and the Ugly

Organizing the Data

Collating Data Into Findings

Using Top-down or Bottom-up Process

Measuring Quantitative Data

How to Measure Outlier Data

Interpreting Qualitative Data

Recording Positive Findings

Summary

Coming Up

Questions/Topics for Discussion

Exercises

For Your Project

References

Appendix 7.1 Events Report for Hotmail #6, User 1

## 8. ANALYZING AND REPORTING RESULTS

Analyzing the Findings

Determining the Causes of Problems

Determining the Scope and Severity of Problems

Making Recommendations

Reporting the Results

Preparing a Written Report  
Preparing an Oral Report  
Preparing a Video-Highlights Tape  
Using Multimedia  
Summary  
Coming Up

Questions/Topics for Discussion

Exercises

For Your Project

References

Appendix 8.1 Hotmail Usability Test Final Report

Appendix 8.2 Video Presentation Documentation

## 9. WEB USABILITY

Problems with the Web—Does It Have to Be This Hard?

Putting the User First

Understanding Real Users' Needs

Design Principles for Web Architecture

Top-10 Web Design Mistakes

Elements of Page Layout

Usability Heuristics for the Web

Other Tools for Web Analysis

Tools without Human Intervention

Tools Used by Humans

Lab or Field Testing of Web Usability

Number of Participants Needed in Web Testing

Eye-Tracking Devices Used in Web Testing

Remote Web Testing

Putting All the Methods Together

Summary

In Closing

Questions/Topics for Discussion

Exercises

References

## APPENDIX: MAKING IT WORK AS A TEAM

Why Work In Teams?

Dimensions of Group Dynamics

Stages of Group Formation

Roles in Groups

Nonverbal Communication

Conflict in Groups

Leadership in Groups

Being an Effective Leader

Managing Effective Meetings

Meeting Planning

Handling Problem Participants

Remote Meetings

Dynamics of Successful Teams

Summary

References

## INDEX
