CBT Integration Guide

A Winning Combination

Prentice Hall is pleased to announce a strategic partnership with **CBT Systems**, a leading developer of interactive computer-based tutorials. CBT has developed a complete set of CD-based tutorials for Oracle Database Administration. These tutorials are available to colleges and universities exclusively through Prentice Hall in conjunction with Lynnwood Brown's *Oracle Database Administration on UNIX Systems*.

The CD-based tutorials were originally created for industry training and are organized around skill levels; *Oracle Database Administration on UNIX Systems*, on the other hand, was developed using conventional chapters. Because the tutorials and the texts cover essentially the same topics, individuals using the two in tandem are provided with a superbly well rounded, truly multimedia introduction to Oracle Database Administration.

The CBT tutorials contain essentially the same topics as the Brown text, albeit in a different sequence. What's more, because the CD tutorials are certified at the expert level, they even contain some advanced topics not found in the text. Accordingly we have created a table of the topics that lists the appropriate CBT tutorial and corresponding Brown chapter.

Once you are finished perusing the list of topics, it's time to get to work. After you close this document, you will be returned to the CBT program group. We suggest you click the icon to install the practice files for the Oracle series to copy the practice files from the CD to your hard drive. Now go to work with the book or the CD. And, of course, we welcome you to visit our web sites at www.phptr.com or www.cbtsys.com.

CBT Tutorials

775 Oracle7 Admin: Fundamentals
776 Oracle7 Admin: Creating an Oracle7 Database
777 Oracle7 Admin: Managing Data & Transactions
778 Oracle7 Admin: Database Structure & Storage
779 Oracle7 Admin: Managing Segments
780 Oracle7 Admin: Managing Constraints
781 Oracle7 Admin: Managing Users & Privileges
782 Oracle7 Admin: Managing Roles & Profiles
784 Oracle7 Admin: Auditing the Database
785 Oracle7 Admin: Advanced Architecture & NLS
786 Oracle7 Backup & Recovery: Backup Considerations
787 Oracle7 Backup & Recovery: Methods & Theory
788 Oracle7 Backup & Recovery: Advanced Techniques
789 Oracle7 Backup & Recovery: Incomplete Recovery
790 Oracle7 Backup & Recovery: Logical Backups
791 Oracle7 Backup & Recovery: Troubleshooting
